

# National Training Center

## Vision:

To provide quality customer service and a state-of-the-art Bureau training facility with traditional and "virtual" classrooms that offer excellent learning opportunities for all U.S. Geological Survey employees in every focus area...scientific, technical, administrative, leadership, management, etc.

## The National Training Center (NTC) Provides:

- a state-of-the-art bureau training facility
- traditional and virtual classrooms
- learning opportunities for all USGS employees in all focus areas

## The NTC Supports Learning by:

- providing course information on schedules and availability
- marketing courses
- classroom set-up with needed equipment
- giving both instructors and students quality customer service
- negotiating lodging reservations
- consulting on course design and delivery
- offering IT and instructional support for technology-based learning

## History:

Since July 1967, the NTC has provided employees of the U.S. Geological Survey training in both resident and distance learning formats.

Room Name	Occupancy	Features and Available Options
Snowmass	35 students	Teamboard, 1 computer for Power Point Presentations and projector use, 2 projection screens
Copper	24 students	Teamboard, 1-computer for PowerPoint presentations and projector use, 16-Dell Precision 340 PCs available for classroom use, 2 projection screens
